## Company Profile

Vega Mfg Ltd. has been a leading custom manufacturer of European designed showcases and merchandising displays for the food industry since 1991. We specialize in the design and production of refrigerated and non-refrigerated display showcases for a variety of food products, such as baked goods, chocolates, confections, delicatessen products, sandwiches, salads, etc. Each one is tailor made to each client's particular needs and styles.

Vega's philosophy is the embodiment of Design, Functionality, and Craftsmanship.

### Design

European design and innovation are brought to North America. The streamlined design and visual appeal give our displays a distinctive style. Vega provides its clients with an ideal merchandising tool, emphasizing the product being displayed and not the display itself. All of our products are made to meet the clients' particular needs, from required lengths to the preferred finishes. This allows for seamless integration into any location.

### Functionality

Vega uses state of the art components such as our showcases' refrigeration and airflow systems, to keep products fresh. Well highlighted and appealing products in coordination with easy staff-patron interaction help to increase sales. Energy efficient components and reduced product spoilage help save the client money. Increasing sales and saving money – that's what a Vega display system can do.

### Craftsmanship

President Walter Kollenberg keeps his hands on each display project from start to finish. His team of European trained craftsmen makes each display with exacting specifications to meet all of the clients' needs. Vega displays house solid-state components. All of our displays are backed by an exclusive warranty.

### The Final Word

Vega Mfg Ltd. produces the finest quality displays and accessories to meet every need and style of its clientele.

Vega is Success in Design, Functionality, and Craftsmanship.

## Products & Services Information

### Customized Designs

Vega provides the highest quality products to suit your particular needs. Specializing in custom display showcases, we also provide a full compliment of corner units, counters and shelving. With custom finishes, the displays are made to match any location's interior design.

### Quality Assurance

Every one of our display units carries the Vega seal of quality and is backed by our exclusive one year limited warranty program. All of our display cases are NSF and CSA/US approved and manufactured with energy efficient solid state components. Vega prides itself on the safe and reduced usage of CFC's (chlorofluorocarbon refrigerants) when manufacturing, installing, operating and maintaining our displays. Finally, customer service and technical support for our clients are of the utmost importance. With our convenient toll free number 1-800-224-8342, we are just a phone call away to help you maximize the benefits and uses of our displays.

## Showcases

Vega products are designed specifically for each establishment. We have showcases designed for baked goods, pastries, delicatessen products, chocolates, sandwiches, etc. We have the products to meet the needs of any market segment in the food industry.

The standard features of tilt down curved front glass, warm tone lighting, light colored extrusions and precise shelf placement combine to best highlight the products within. By utilizing our specially designed refrigeration and airflow systems, an ideal environment is maintained to keep products fresh and appealing.

Our standard modular unit lengths are 962 mm (3'-2") and 1412 mm (4'-7 1/2"). These units can be combined to make almost any length, with custom corner cases and counter units to ensure the perfect fit. With an almost limitless choice of finishes, each showcase will integrate seamlessly into any location.

### **Modular Series Showcases:**

The distinct features of the modular series are the large visual display area and the convenient customer side purse shelf. The internal display configuration is made specifically for each type of product. The various models in this series provide the flexibility to suit many different applications.

### **High Volume Series Showcases:**

Designed primarily for bakery and Coffee Shop / Cafe products, this series of showcases maximizes the overall capacity for products displayed.

### **"Grab n Go" Series Showcases:**

Designed with the "customer on the go" in mind. The convenience of self serve and the consistent display for a variety of prepared goods. Display more product and serve more people.

### **Café Series Showcases:**

Made specifically for cafeteria style service, these showcases feature a tray shelf (replacing the purse shelf in the Modular Series). This series of showcases provides consistent display for a full variety of prepared foods.

### **Custom Front Service Counter:**

The counters are designed to integrate into any type of showcase and provide space for full customer service.

### **Options and Accessories**

Vega compliments its showcases with a wide variety of optional extras to help customize and realize all display possibilities.

# Standard Showcase Lengths (Other Lengths Available)

## Modular Series: Refrigerated Pastry Showcases

Vega's Pastry Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for cakes and pastries. The combination of streamlined design and leading edge components enhances and maintains product appearance and freshness.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Two intermediate glass shelves**
  - increased capacity & visual appeal
- **Intermediate top-glass barrier**
  - reduces condensation on top of showcase
- **Pull-out sliding drawer(s)**
  - ergonomic & convenient access to product
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Front glass defogger**
  - minimizes front glass condensation
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical & Refrigeration Requirements:

- 1 circuit – 115 volts – 15 amps.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 (others available) medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain – not required if Self-Contained

### Temperature:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% relative humidity, at an ambient temperature of 77°F (25°C) and 50% humidity.

Specifications subject to change without notice.

## Modular Series: Non-Refrigerated Bakery Showcases

Vega's Modular Series Non-Refrigerated Pastry Showcases are designed to highlight and enhance product presentation. The combination of tilt-down curved front glass, warm tone lighting and light colored extrusions ensure the baked goods are the center of attention.

### **Features and benefits:**

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Two intermediate glass shelves**
  - increased capacity & visual appeal
- **Angle base display (ready for cake trays)**
  - clear product visibility
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Optional: purse shelf**
  - customer convenience & visual accent

- **Electrical Requirements:**
  - 1 circuit – 115 volts – 15 amps.

*Specifications subject to change without notice.*

## Modular Series: Refrigerated Delicatessen/Savory Showcases

Vega's Modular Series Refrigerated Delicatessen Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for meats and cheeses. The combination of streamlined design and leading edge components enhances and maintains product appearance and freshness.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **One intermediate glass shelf**
  - increased capacity & visual appeal
- **Intermediate top-glass barrier**
  - reduces condensation on top of showcase
- **Two step stainless steel display platform**
  - increased capacity & visual
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Front glass defogger**
  - minimizes front glass condensation
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain – not required if Self-Contained

### Temperature:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% relative humidity, at an ambient temperature of 77°F (25°C) and 50% humidity.

Specifications subject to change without notice.

## Modular Series: Refrigerated Chocolate Showcases

Vega's Modular Series Refrigerated Chocolate Showcases utilize the low humidity refrigeration and airflow systems to ensure the proper environment for chocolates. The combination of curved front glass, warm tone lighting and light colored display ensures the chocolates are the center of attention.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **One intermediate glass shelf**
  - increased capacity & visual appeal
- **Three step anodized aluminum display platform**
  - increased capacity & visual
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Small refrigeration coil**
  - low humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Low humidity refrigeration system**
  - maintains proper humidity level
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.
- 14-2 (stranded) control line required between showcase and condensing unit.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium/high temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain - not required if Self-Contained

### Temperature:

- Internal temperature of the showcase operates between 59°F (15°C) to 63°F (17°F) at an ambient temperature of 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice.*

## Modular Series: Hot Food Showcases

Vega's Modular Series Hot Food Showcases are designed to allow for drop-in food wells, overhead heaters, or countertop hot plates. Soups, sauces, pizza and other savory products are heated, kept warm and well displayed. A stainless steel finished countertop and a cutting/work surface area are incorporated for the convenience of the staff.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Stainless steel finished platform with optional cut-out opening(s)**
  - sanitary surface
- **Plastic cutting/work surface (White)**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Optional: purse shelf**
  - customer convenience & visual accent
- **Optional: Hot food wells, hot plates, heat lamps and stainless steel inserts**

### **Electrical Requirements:**

- 1 circuit – 115 volts – 15 amps.
- Separate electrical lines as required for hot food wells, hot plates and heat lamps.

*Specifications subject to change without notice.*

## Modular Series: Sandwich Preparation Showcases

Vega's Modular Series Sandwich Showcases are designed to allow for an under counter refrigerated compartment with an opening for condiment inserts on top. A plastic laminate finished countertop and a cutting/work surface are incorporated for the convenience of the staff.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Plastic laminate finished platform with optional cut-out opening(s)**
  - sanitary surface
- **Plastic cutting/work surface (White)**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Powder coated painted steel base frame**
  - strong & durable
- **Optional: purse shelf**
  - customer convenience & visual accent
- **Optional: Undercounter refrigerated sandwich table**

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.
- Separate electrical lines as required for refrigerated sandwich table.

*Specifications subject to change without notice.*

## High Volume Series: Refrigerated Pastry Showcases

Vega's High Volume Series Refrigerated Pastry Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for cakes and pastries. What sets this series apart from the Modular Series models are the additional shelf and the extra depth of each display level. Greater capacity is attained while maintaining optimal visibility.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Three intermediate glass shelves**
  - increased capacity & visual appeal
- **Stainless steel base display platform**
  - increased capacity & sanitary surface
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Front glass defogger**
  - minimizes front glass condensation
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical Requirements:

- 1 circuit – 115 volts –15 amp.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain – not required if Self-Contained

### Temperature:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% relative humidity, at an ambient temperature of 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice.*

## High Volume Series: Non-Refrigerated Bakery Showcases

Vega's High Volume Series Non-Refrigerated Bakery Showcases are designed to highlight and enhance product presentation. The combination of tilt-down curved front glass, warm tone lighting and light colored extrusions ensures the baked goods are the center of attention. What sets this series apart from the Modular Series models are the additional shelf and extra depth of each display level. Greater capacity is attained while maintaining optimal visibility.

### **Features and benefits:**

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Three intermediate glass shelves**
  - increased capacity & visual appeal
- **Plastic laminate finished base display**
  - increased capacity & visual appeal
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor

  - strong & durable
- **Optional: purse shelf**
  - customer convenience & visual accent

### **Electrical Requirements:**

- 1 circuit – 115 volts – 15 amps.

*Specifications subject to change without notice.*

## High Volume Series: Hybrid Showcases

Vega's High Volume Series Hybrid Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for cakes and pastries. What sets this series apart from the Modular Series models are the additional shelf and the extra depth of each display level. Greater capacity is attained while maintaining optimal visibility.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Three intermediate glass shelves**
  - increased capacity & visual appeal
- **Stainless steel base display platform**
  - increased capacity & sanitary surface
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Front glass defogger**
  - minimizes front glass condensation
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% relative humidity, at an ambient temperature of 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice.*

## "Grab n Go" Series: Refrigerated Upright Showcases

Vega's "Grab n Go" Refrigerated Upright Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for your products. The combination of streamlined design and leading edge components enhances and maintains product appearance and freshness.

### Features and benefits:

- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Two intermediate glass shelves**
  - increased capacity & visual appeal
- **Two step stainless steel display platform**
  - increased capacity & visual
- **End panels (Mirror finish available)**
  - increased capacity & visual
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient

### **Electrical Requirements:**

- 1 circuit – 115 volts – 15 amps.

### **Refrigeration Requirements:**

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### **Mechanical Requirement:**

- 3" hub drain – not required if Self-Contained

### **Temperature:**

- Internal temperature of the showcase operates at 39°F (4°C) at an ambient temperature 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice*

## "Grab n Go" Series: Refrigerated / Non Refrigerated Combo Showcases

Vega's "Grab n Go" Series Refrigerated / Non Refrigerated Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for your products. The combination of streamlined design and leading edge components enhances and maintains product appearance and freshness.

### Features and benefits:

- **Curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **One intermediate glass shelf**
  - increased capacity & visual appeal
- **Two step stainless steel display platform**
  - increased capacity & visual
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **End panels (Mirror finish available)**
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient

### **Electrical Requirements:**

- 1 circuit – 115 volts – 15 amps.

### **Refrigeration Requirements:**

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### **Mechanical Requirement:**

- 3" hub drain – not required if Self-Contained

### **Temperature:**

- Internal temperature of the showcase operates at 39°F (4°C) at an ambient temperature 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice*

## "Grab n Go" Series: Refrigerated Lowboy Showcase

Vega's "Grab n Go" Series Refrigerated Lowboy Showcases utilize the specially made refrigeration and airflow systems to ensure the proper environment for meats and cheeses. The combination of streamlined design and leading edge components enhances and maintains product appearance and freshness.

### Features and benefits:

- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Two step stainless steel display platform**
  - increased capacity & visual
- **Plastic laminate finished work shelf**
  - useful work space
- **Plastic laminate finished exterior**
  - matches décor
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient
- **Optional: purse shelf**
  - customer convenience & visual accent

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain – not required if Self- Contained

### Temperature:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% at an ambient temperature of 77°F (25°C) and 50% humidity.

*Specifications subject to change without notice.*

## Café Series: Refrigerated Showcases

Vega's Café Series Refrigerated Showcases are extensions of the Modular Series displays with the addition of the unique display platforms and convenient front tray shelf for the customers. The computerized refrigeration and airflow systems are designed to ensure the proper environment for all types of products.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **One intermediate glass shelf**
  - increased capacity & visual appeal
- **Intermediate top-glass barrier**
  - reduces condensation on top of showcase
- **Two step stainless steel display platform**
  - increased capacity & visual appeal
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Plastic laminate finished tray shelf**
  - customer convenience & visual accent
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Insulated stainless steel refrigeration pan**
  - sanitary (meets health standards)
- **Front glass defogger**
  - minimizes front glass condensation
- **Refrigeration system**
  - consistent cooling
- **Extra large refrigeration coil**
  - high humidity
- **Adjustable air circulating system**
  - maintains consistent temperature
- **Computerized temperature controller with automatic defrost**
  - active sensor reading & energy efficient

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.

### Refrigeration Requirements:

- optional water or air cooled condensing unit
- R-22 medium temperature
- separate electrical line as required for condensing unit

### Mechanical Requirement:

- 3" hub drain – not required if Self-Contained

### Temperature:

- Internal temperature of the showcase operates at 39°F (4°C) and 70% relative humidity, at an ambient temperature of 77°F (25°C) and 50% humidity.

Specifications subject to change without notice.

## Café Series: Non-Refrigerated Showcases

Vega's Café Series Non-Refrigerated Showcases are extensions of the Modular Series displays with the addition of the unique display platforms and convenient front tray shelf for the customers. This series retains the tilt-down curved front glass, warm tone lighting and light colored extrusions to ensure optimal visibility.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above each display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **One intermediate glass shelf**
  - increased capacity & visual appeal
- **Two step stainless steel display platform**
  - increased capacity & visual appeal
- **Clear acrylic sliding service doors**
  - convenient access & clear work-side view
- **Plastic laminate finished work shelf**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Plastic laminate finished tray shelf**
  - customer convenience & visual accent
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.

*Specifications subject to change without notice.*

## Café Series: Hot Food Showcases

Vega's Café Series Hot Food Showcases are designed to allow for drop-in food wells, overhead heaters, or countertop hot plates. Soups, sauces, pizza and other savory products are heated, kept warm and well displayed. A stainless steel finished countertop and a cutting/work surface are incorporated for the convenience of the staff, while the front tray shelf is provided to the customers.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Stainless steel finished platform with optional cut-out opening(s)**
  - sanitary surface
- **Plastic cutting/work surface (White)**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Plastic laminate finished tray shelf**
  - customer convenience & visual accent
- **Melamine finished open storage shelf**
  - convenient staff storage space
- **Powder coated painted steel base frame**
  - strong & durable
- **Optional: Hot food wells, hot plates, heat lamps and stainless steel inserts**

### **Electrical Requirements:**

- 1 circuit – 115 volts – 15 amps.
- Separate electrical lines as required for hot food wells, hot plates and heat lamps.

## Café Series: Sandwich Preparation Showcases

Vega's Café Series Sandwich Showcases are designed to allow for an under counter refrigerated compartment with an opening for condiment inserts on top. A plastic laminate finished countertop and a cutting/work surface are incorporated for the convenience of the staff, while the front tray shelf is provided to the customers.

### Features and benefits:

- **Tilt down curved front glass**
  - streamlined design & aesthetically pleasing
  - ease of cleaning
- **Warm tone lighting above display level**
  - enhances product display & visibility
- **Electronic ballasts**
  - energy efficient & long lasting
- **Plastic laminate finished platform with optional cut-out opening(s)**
  - sanitary surface
- **Plastic cutting/work surface (White)**
  - useful work space
- **Glass end panels (Mirror finish available)**
  - clear visibility
  - removable for ease of cleaning
- **Anodized finished aluminum superstructure**
  - eye pleasing & durable finish
- **Plastic laminate finished exterior**
  - matches décor
- **Plastic laminate finished tray shelf**
  - customer convenience & visual accent
- **Powder coated painted steel base frame**
  - strong & durable
- **Optional: Undercounter refrigerated sandwich table**

### Electrical Requirements:

- 1 circuit – 115 volts – 15 amps.
- Separate electrical lines as required for refrigerated sandwich table.
